

## **BR921 Commvault® Engineer**

### **Kurzbeschreibung:**

Elevate your knowledge of Commvault® software and maximize your organizations investment by learning and applying infrastructure design concepts in your environment.

### **Zielgruppe:**

This course is intended for experienced administrators and engineers looking to elevate their knowledge in CommCell® design strategies focusing on storage design and cloud computing, Deduplication, Commvault HyperScale, virtual data protection, and application protection.

### **Voraussetzungen:**

It is recommended to have previously attended the following courses: -Commvault® Professional Foundations -Commvault® Professional Advanced In addition, it is advisable to have already obtained the Commvault® Certified Professional certification.

### **Sonstiges:**

**Dauer:** 3 Tage

**Preis:** 2160 Euro plus Mwst.

### **Ziele:**

Elevate your knowledge of Commvault® software and maximize your organizations investment by learning and applying infrastructure design concepts in your environment. The Commvault Engineer course focuses on a deeper understanding of topics such as: -CommCell® design -Storage configuration -Cloud computing and disaster recovery -Commvault Deduplication -Application protection in a virtual infrastructure

#### Inhalte/Agenda:

- This course is structured as a design and implementation project where Commvault best practices are applied to prepare the participant to optimally plan for:
  - ◆ CommServe® placement
  - ◆ MediaAgent scaling, deduplication engine design
  - ◆ Commvault HyperScale
  - ◆ Snapshot implementation
  - ◆ Virtual Server Agent configuration from the ground up
  - ◆ Performance
- Emphasis is placed on VM protection, particularly for protecting virtualized applications including Microsoft Exchange, SQL and SharePoint.
